

MICRO COMPUTER INSTITUTE

AI Tools for Study & Work

Foundation Study Pack - Volume 1

AI | Duration: 1 Month

Learn - Practise - Apply

A structured bilingual-support handbook for classroom, lab and online learners.

Student use: Read each module, complete the lab activity, save evidence in your portfolio, and discuss doubts with your instructor.

Hindi support (Roman): Har module ko padhen, practical lab activity poori karen, apna work save karen aur doubt teacher se poochhen.

Course Roadmap

This 1 Month programme is organised into 8 learning modules. The sequence may be adjusted by the instructor to match the batch calendar.

No.	Module	Learning focus
1	AI Foundations	What generative AI can and cannot do; responsible use.
2	Prompt Writing	Goal, context, constraints, examples and output format.
3	Study Support	Summaries, quizzes, explanations and revision plans with verification.
4	Office Work	Drafting, spreadsheet assistance, presentations and meeting notes.
5	Research & Fact Checking	Source evaluation, cross-checking and citation habits.
6	Creative Work	Images, ideas, storyboards and brand content with copyright care.
7	Privacy & Ethics	Sensitive data, bias, hallucination and human review.
8	Final Workflow	Build a repeatable AI-assisted task with quality checklist.

Module 1: AI Foundations

What generative AI can and cannot do; responsible use.

Key ideas

- Explain the purpose and essential vocabulary of ai foundations.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates ai foundations. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 2: Prompt Writing

Goal, context, constraints, examples and output format.

Key ideas

- Explain the purpose and essential vocabulary of prompt writing.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates prompt writing. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 3: Study Support

Summaries, quizzes, explanations and revision plans with verification.

Key ideas

- Explain the purpose and essential vocabulary of study support.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates study support. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 4: Office Work

Drafting, spreadsheet assistance, presentations and meeting notes.

Key ideas

- Explain the purpose and essential vocabulary of office work.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates office work. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 5: Research & Fact Checking

Source evaluation, cross-checking and citation habits.

Key ideas

- Explain the purpose and essential vocabulary of research & fact checking.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates research & fact checking. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 6: Creative Work

Images, ideas, storyboards and brand content with copyright care.

Key ideas

- Explain the purpose and essential vocabulary of creative work.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates creative work. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 7: Privacy & Ethics

Sensitive data, bias, hallucination and human review.

Key ideas

- Explain the purpose and essential vocabulary of privacy & ethics.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates privacy & ethics. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 8: Final Workflow

Build a repeatable AI-assisted task with quality checklist.

Key ideas

- Explain the purpose and essential vocabulary of final workflow.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates final workflow. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Practical Workbook

Complete these tasks in order. The instructor may adapt names and sample data, but every learner should produce original work.

Practical 1. Create and save a correctly named practice file for AI Foundations. Include a short note describing what you learned.

Practical 2. Create and save a correctly named practice file for Prompt Writing. Include a short note describing what you learned.

Practical 3. Create and save a correctly named practice file for Study Support. Include a short note describing what you learned.

Practical 4. Create and save a correctly named practice file for Office Work. Include a short note describing what you learned.

Practical 5. Create and save a correctly named practice file for Research & Fact Checking. Include a short note describing what you learned.

Practical 6. Create and save a correctly named practice file for Creative Work. Include a short note describing what you learned.

Portfolio checklist

- Use folder format: CourseCode / StudentName / Module / Activity.
- Keep editable source files plus exported PDF or screenshot.
- Do not copy another student work; mention sources used.
- Back up important work in two locations.

Assignments & Assessment

Assignment 1: Concept Check

Write 300-500 words explaining three important concepts from AI Foundations and Prompt Writing. Add one real-life example.

Assignment 2: Practical Submission

Complete a combined task using Study Support and Office Work. Submit source file, output and a one-page process note.

Assignment 3: Problem Solving

Identify a realistic institute or small-business problem that can be improved using AI Tools for Study & Work. Propose steps, tools, risks and success measures.

Assignment 4: Final Project

Build a complete project using at least four course modules. Test it, prepare screenshots, and present the result in 5-7 minutes.

Criterion	Weight
Accuracy and completeness	30%
Practical application	30%
Presentation and file organisation	20%
Originality, explanation and safe practice	20%

Revision & Safe Learning Guide

- Review class notes within 24 hours and practise again without watching the demonstration.
- Use legal software and trusted downloads. Scan external drives and downloaded files.
- Never share passwords, OTPs, private documents or student data.
- Verify AI-generated or internet information before using it in assignments.
- Use clear filenames, version numbers and regular backups.
- Ask for help when an error could damage data, equipment or accounts.

Quick viva questions

1. What is the purpose of AI Foundations, and what common mistake should a beginner avoid?
2. What is the purpose of Prompt Writing, and what common mistake should a beginner avoid?
3. What is the purpose of Study Support, and what common mistake should a beginner avoid?
4. What is the purpose of Office Work, and what common mistake should a beginner avoid?
5. What is the purpose of Research & Fact Checking, and what common mistake should a beginner avoid?
6. What is the purpose of Creative Work, and what common mistake should a beginner avoid?
