

MICRO COMPUTER INSTITUTE

Data Entry & Office Assistant

Foundation Study Pack - Volume 1

DATA | Duration: 3 Months

Learn - Practise - Apply

A structured bilingual-support handbook for classroom, lab and online learners.

Student use: Read each module, complete the lab activity, save evidence in your portfolio, and discuss doubts with your instructor.

Hindi support (Roman): Har module ko padhen, practical lab activity poori karen, apna work save karen aur doubt teacher se poochhen.

Course Roadmap

This 3 Months programme is organised into 8 learning modules. The sequence may be adjusted by the instructor to match the batch calendar.

No.	Module	Learning focus
1	Typing & Accuracy	Touch typing, posture, speed building and proofreading.
2	File Management	Folder standards, naming, scanning, PDF handling and backups.
3	Word Processing	Letters, notices, tables, mail merge and office templates.
4	Spreadsheet Entry	Data types, validation, formulas, sorting and filtering.
5	Office Communication	Email etiquette, phone notes and document movement.
6	Records & MIS	Registers, attendance, stock and daily reporting.
7	Digital Office Tools	Cloud drives, online forms, calendars and collaboration.
8	Employability	Resume, interview preparation and workplace professionalism.

Module 1: Typing & Accuracy

Touch typing, posture, speed building and proofreading.

Key ideas

- Explain the purpose and essential vocabulary of typing & accuracy.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates typing & accuracy. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 2: File Management

Folder standards, naming, scanning, PDF handling and backups.

Key ideas

- Explain the purpose and essential vocabulary of file management.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates file management. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 3: Word Processing

Letters, notices, tables, mail merge and office templates.

Key ideas

- Explain the purpose and essential vocabulary of word processing.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates word processing. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 4: Spreadsheet Entry

Data types, validation, formulas, sorting and filtering.

Key ideas

- Explain the purpose and essential vocabulary of spreadsheet entry.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates spreadsheet entry. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 5: Office Communication

Email etiquette, phone notes and document movement.

Key ideas

- Explain the purpose and essential vocabulary of office communication.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates office communication. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 6: Records & MIS

Registers, attendance, stock and daily reporting.

Key ideas

- Explain the purpose and essential vocabulary of records & mis.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates records & mis. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 7: Digital Office Tools

Cloud drives, online forms, calendars and collaboration.

Key ideas

- Explain the purpose and essential vocabulary of digital office tools.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates digital office tools. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 8: Employability

Resume, interview preparation and workplace professionalism.

Key ideas

- Explain the purpose and essential vocabulary of employability.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates employability. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Practical Workbook

Complete these tasks in order. The instructor may adapt names and sample data, but every learner should produce original work.

Practical 1. Create and save a correctly named practice file for Typing & Accuracy. Include a short note describing what you learned.

Practical 2. Create and save a correctly named practice file for File Management. Include a short note describing what you learned.

Practical 3. Create and save a correctly named practice file for Word Processing. Include a short note describing what you learned.

Practical 4. Create and save a correctly named practice file for Spreadsheet Entry. Include a short note describing what you learned.

Practical 5. Create and save a correctly named practice file for Office Communication. Include a short note describing what you learned.

Practical 6. Create and save a correctly named practice file for Records & MIS. Include a short note describing what you learned.

Portfolio checklist

- Use folder format: CourseCode / StudentName / Module / Activity.
- Keep editable source files plus exported PDF or screenshot.
- Do not copy another student work; mention sources used.
- Back up important work in two locations.

Assignments & Assessment

Assignment 1: Concept Check

Write 300-500 words explaining three important concepts from Typing & Accuracy and File Management. Add one real-life example.

Assignment 2: Practical Submission

Complete a combined task using Word Processing and Spreadsheet Entry. Submit source file, output and a one-page process note.

Assignment 3: Problem Solving

Identify a realistic institute or small-business problem that can be improved using Data Entry & Office Assistant. Propose steps, tools, risks and success measures.

Assignment 4: Final Project

Build a complete project using at least four course modules. Test it, prepare screenshots, and present the result in 5-7 minutes.

Criterion	Weight
Accuracy and completeness	30%
Practical application	30%
Presentation and file organisation	20%
Originality, explanation and safe practice	20%

Revision & Safe Learning Guide

- Review class notes within 24 hours and practise again without watching the demonstration.
- Use legal software and trusted downloads. Scan external drives and downloaded files.
- Never share passwords, OTPs, private documents or student data.
- Verify AI-generated or internet information before using it in assignments.
- Use clear filenames, version numbers and regular backups.
- Ask for help when an error could damage data, equipment or accounts.

Quick viva questions

1. What is the purpose of Typing & Accuracy, and what common mistake should a beginner avoid?
2. What is the purpose of File Management, and what common mistake should a beginner avoid?
3. What is the purpose of Word Processing, and what common mistake should a beginner avoid?
4. What is the purpose of Spreadsheet Entry, and what common mistake should a beginner avoid?
5. What is the purpose of Office Communication, and what common mistake should a beginner avoid?
6. What is the purpose of Records & MIS, and what common mistake should a beginner avoid?
