

MICRO COMPUTER INSTITUTE

DTP & Graphic Design

Foundation Study Pack - Volume 1

DTP | Duration: 6 Months

Learn - Practise - Apply

A structured bilingual-support handbook for classroom, lab and online learners.

Student use: Read each module, complete the lab activity, save evidence in your portfolio, and discuss doubts with your instructor.

Hindi support (Roman): Har module ko padhen, practical lab activity poori karen, apna work save karen aur doubt teacher se poochhen.

Course Roadmap

This 6 Months programme is organised into 8 learning modules. The sequence may be adjusted by the instructor to match the batch calendar.

No.	Module	Learning focus
1	Design Foundations	Layout, hierarchy, alignment, balance, contrast and grids.
2	Typography	Font selection, spacing, readability and multilingual composition.
3	Image Editing	Resolution, crop, colour correction, layers and export formats.
4	Vector Graphics	Shapes, paths, logos, icons and scalable artwork.
5	Page Layout	Flyers, brochures, books, certificates and print imposition.
6	Brand Design	Logo use, colour palette, templates and visual consistency.
7	Print Production	CMYK, bleed, margins, PDF export and preflight.
8	Portfolio	Create a coordinated identity and five production-ready designs.

Module 1: Design Foundations

Layout, hierarchy, alignment, balance, contrast and grids.

Key ideas

- Explain the purpose and essential vocabulary of design foundations.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates design foundations. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 2: Typography

Font selection, spacing, readability and multilingual composition.

Key ideas

- Explain the purpose and essential vocabulary of typography.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates typography. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 3: Image Editing

Resolution, crop, colour correction, layers and export formats.

Key ideas

- Explain the purpose and essential vocabulary of image editing.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates image editing. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 4: Vector Graphics

Shapes, paths, logos, icons and scalable artwork.

Key ideas

- Explain the purpose and essential vocabulary of vector graphics.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates vector graphics. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 5: Page Layout

Flyers, brochures, books, certificates and print imposition.

Key ideas

- Explain the purpose and essential vocabulary of page layout.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates page layout. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 6: Brand Design

Logo use, colour palette, templates and visual consistency.

Key ideas

- Explain the purpose and essential vocabulary of brand design.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates brand design. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 7: Print Production

CMYK, bleed, margins, PDF export and preflight.

Key ideas

- Explain the purpose and essential vocabulary of print production.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates print production. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 8: Portfolio

Create a coordinated identity and five production-ready designs.

Key ideas

- Explain the purpose and essential vocabulary of portfolio.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates portfolio. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Practical Workbook

Complete these tasks in order. The instructor may adapt names and sample data, but every learner should produce original work.

Practical 1. Create and save a correctly named practice file for Design Foundations. Include a short note describing what you learned.

Practical 2. Create and save a correctly named practice file for Typography. Include a short note describing what you learned.

Practical 3. Create and save a correctly named practice file for Image Editing. Include a short note describing what you learned.

Practical 4. Create and save a correctly named practice file for Vector Graphics. Include a short note describing what you learned.

Practical 5. Create and save a correctly named practice file for Page Layout. Include a short note describing what you learned.

Practical 6. Create and save a correctly named practice file for Brand Design. Include a short note describing what you learned.

Portfolio checklist

- Use folder format: CourseCode / StudentName / Module / Activity.
- Keep editable source files plus exported PDF or screenshot.
- Do not copy another student work; mention sources used.
- Back up important work in two locations.

Assignments & Assessment

Assignment 1: Concept Check

Write 300-500 words explaining three important concepts from Design Foundations and Typography. Add one real-life example.

Assignment 2: Practical Submission

Complete a combined task using Image Editing and Vector Graphics. Submit source file, output and a one-page process note.

Assignment 3: Problem Solving

Identify a realistic institute or small-business problem that can be improved using DTP & Graphic Design. Propose steps, tools, risks and success measures.

Assignment 4: Final Project

Build a complete project using at least four course modules. Test it, prepare screenshots, and present the result in 5-7 minutes.

Criterion	Weight
Accuracy and completeness	30%
Practical application	30%
Presentation and file organisation	20%
Originality, explanation and safe practice	20%

Revision & Safe Learning Guide

- Review class notes within 24 hours and practise again without watching the demonstration.
- Use legal software and trusted downloads. Scan external drives and downloaded files.
- Never share passwords, OTPs, private documents or student data.
- Verify AI-generated or internet information before using it in assignments.
- Use clear filenames, version numbers and regular backups.
- Ask for help when an error could damage data, equipment or accounts.

Quick viva questions

1. What is the purpose of Design Foundations, and what common mistake should a beginner avoid?
2. What is the purpose of Typography, and what common mistake should a beginner avoid?
3. What is the purpose of Image Editing, and what common mistake should a beginner avoid?
4. What is the purpose of Vector Graphics, and what common mistake should a beginner avoid?
5. What is the purpose of Page Layout, and what common mistake should a beginner avoid?
6. What is the purpose of Brand Design, and what common mistake should a beginner avoid?
