

MICRO COMPUTER INSTITUTE

Advanced Excel & MIS

Foundation Study Pack - Volume 1

EXCEL | Duration: 2 Months

Learn - Practise - Apply

A structured bilingual-support handbook for classroom, lab and online learners.

Student use: Read each module, complete the lab activity, save evidence in your portfolio, and discuss doubts with your instructor.

Hindi support (Roman): Har module ko padhen, practical lab activity poori karen, apna work save karen aur doubt teacher se poochhen.

Course Roadmap

This 2 Months programme is organised into 8 learning modules. The sequence may be adjusted by the instructor to match the batch calendar.

No.	Module	Learning focus
1	Workbook Design	Structured sheets, tables, naming, data types and error prevention.
2	Core Functions	SUMIFS, COUNTIFS, IF, IFS, text, date and error-handling functions.
3	Lookup Skills	XLOOKUP, INDEX-MATCH and reliable reference design.
4	Data Cleaning	Remove duplicates, text-to-columns, flash fill and Power Query basics.
5	Analysis	Sorting, filtering, subtotals, PivotTables and PivotCharts.
6	MIS Dashboards	KPIs, slicers, conditional formatting and management summaries.
7	Automation	Recorded macros, relative references and safe workbook controls.
8	Final Project	Create a monthly sales, fees or attendance MIS dashboard.

Module 1: Workbook Design

Structured sheets, tables, naming, data types and error prevention.

Key ideas

- Explain the purpose and essential vocabulary of workbook design.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates workbook design. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 2: Core Functions

SUMIFS, COUNTIFS, IF, IFS, text, date and error-handling functions.

Key ideas

- Explain the purpose and essential vocabulary of core functions.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates core functions. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 3: Lookup Skills

XLOOKUP, INDEX-MATCH and reliable reference design.

Key ideas

- Explain the purpose and essential vocabulary of lookup skills.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates lookup skills. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 4: Data Cleaning

Remove duplicates, text-to-columns, flash fill and Power Query basics.

Key ideas

- Explain the purpose and essential vocabulary of data cleaning.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates data cleaning. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 5: Analysis

Sorting, filtering, subtotals, PivotTables and PivotCharts.

Key ideas

- Explain the purpose and essential vocabulary of analysis.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates analysis. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 6: MIS Dashboards

KPIs, slicers, conditional formatting and management summaries.

Key ideas

- Explain the purpose and essential vocabulary of mis dashboards.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates mis dashboards. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 7: Automation

Recorded macros, relative references and safe workbook controls.

Key ideas

- Explain the purpose and essential vocabulary of automation.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates automation. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Module 8: Final Project

Create a monthly sales, fees or attendance MIS dashboard.

Key ideas

- Explain the purpose and essential vocabulary of final project.
- Demonstrate the standard workflow accurately and safely.
- Choose suitable tools, settings and file formats for the task.
- Check the output, correct errors and save work with a meaningful name.

Lab activity

Create a small working example that demonstrates final project. Save the source file and a PDF or screenshot as evidence.

Self-check: Can you repeat the task without step-by-step help and explain why each important step is used?

Practical Workbook

Complete these tasks in order. The instructor may adapt names and sample data, but every learner should produce original work.

Practical 1. Create and save a correctly named practice file for Workbook Design. Include a short note describing what you learned.

Practical 2. Create and save a correctly named practice file for Core Functions. Include a short note describing what you learned.

Practical 3. Create and save a correctly named practice file for Lookup Skills. Include a short note describing what you learned.

Practical 4. Create and save a correctly named practice file for Data Cleaning. Include a short note describing what you learned.

Practical 5. Create and save a correctly named practice file for Analysis. Include a short note describing what you learned.

Practical 6. Create and save a correctly named practice file for MIS Dashboards. Include a short note describing what you learned.

Portfolio checklist

- Use folder format: CourseCode / StudentName / Module / Activity.
- Keep editable source files plus exported PDF or screenshot.
- Do not copy another student work; mention sources used.
- Back up important work in two locations.

Assignments & Assessment

Assignment 1: Concept Check

Write 300-500 words explaining three important concepts from Workbook Design and Core Functions. Add one real-life example.

Assignment 2: Practical Submission

Complete a combined task using Lookup Skills and Data Cleaning. Submit source file, output and a one-page process note.

Assignment 3: Problem Solving

Identify a realistic institute or small-business problem that can be improved using Advanced Excel & MIS. Propose steps, tools, risks and success measures.

Assignment 4: Final Project

Build a complete project using at least four course modules. Test it, prepare screenshots, and present the result in 5-7 minutes.

Criterion	Weight
Accuracy and completeness	30%
Practical application	30%
Presentation and file organisation	20%
Originality, explanation and safe practice	20%

Revision & Safe Learning Guide

- Review class notes within 24 hours and practise again without watching the demonstration.
- Use legal software and trusted downloads. Scan external drives and downloaded files.
- Never share passwords, OTPs, private documents or student data.
- Verify AI-generated or internet information before using it in assignments.
- Use clear filenames, version numbers and regular backups.
- Ask for help when an error could damage data, equipment or accounts.

Quick viva questions

1. What is the purpose of Workbook Design, and what common mistake should a beginner avoid?
2. What is the purpose of Core Functions, and what common mistake should a beginner avoid?
3. What is the purpose of Lookup Skills, and what common mistake should a beginner avoid?
4. What is the purpose of Data Cleaning, and what common mistake should a beginner avoid?
5. What is the purpose of Analysis, and what common mistake should a beginner avoid?
6. What is the purpose of MIS Dashboards, and what common mistake should a beginner avoid?
