

Digital Marketing

Detailed Chapter Notes & Worked Examples - Volume 2

This pack develops practical understanding through explanations, worked examples, lab tasks and review questions. Complete the matching Foundation Pack first.

Chapter	Topic
1	Audience and funnel
2	Content and SEO
3	Advertising measurement
4	Analytics and improvement

Chapter 1: Audience and funnel

Concept notes

Define a specific audience problem, offer and next action. Funnel stages are awareness, consideration, conversion and retention; each needs a different message.

Worked example

For a local computer course: awareness reel, syllabus comparison page, admission form and student follow-up message.

Lab assignment

Create one content item for each funnel stage.

Review questions

1. What is a conversion?
2. Why change message by stage?
3. What is a clear CTA?

Evidence to submit: source file or working output, screenshot/PDF, and a 100-word explanation of decisions and checks.

Chapter 2: Content and SEO

Concept notes

Useful content matches search intent. A page needs a descriptive title, one clear topic, headings, internal links and truthful local details. Avoid keyword stuffing.

Worked example

Target "computer course in Bihar Sharif" with course facts, fees guidance, address, FAQs and admission action.

Lab assignment

Draft a 600-word page outline and metadata.

Review questions

1. What is search intent?
2. Why use headings?
3. What is keyword stuffing?

Evidence to submit: source file or working output, screenshot/PDF, and a 100-word explanation of decisions and checks.

Chapter 3: Advertising measurement

Concept notes

Campaign objective determines optimization. Track impressions, clicks, leads, cost and verified admissions. Cheap clicks are not success if leads are irrelevant.

Worked example

Spend Rs 3,000, receive 150 clicks and 15 leads: CPC Rs 20, lead conversion 10%, CPL Rs 200.

Lab assignment

Create a campaign sheet and calculate CPC, CTR, conversion and CPL.

Review questions

1. How calculate CPL?
2. Why verify leads?
3. Which metric matches admission goal?

Evidence to submit: source file or working output, screenshot/PDF, and a 100-word explanation of decisions and checks.

Chapter 4: Analytics and improvement

Concept notes

Use UTM parameters to identify source, medium and campaign. Compare results against a baseline; change one major variable at a time.

Worked example

Compare two creatives with equal audience and budget; retain the one with better qualified-lead rate, not just clicks.

Lab assignment

Prepare a one-page campaign review with next experiment.

Review questions

1. What does UTM identify?
2. Why change one variable?
3. What is a qualified lead?

Evidence to submit: source file or working output, screenshot/PDF, and a 100-word explanation of decisions and checks.

Final Applied Assignment

Create one original project that combines all four chapters of Digital Marketing. Use realistic but non-sensitive sample data. Submit planning notes, source files, final output, test evidence and a one-page reflection.

Assessment rubric

Area	Marks
Concept accuracy	25
Working practical output	30
Validation and testing	20
File organisation and presentation	15
Original explanation	10

Student declaration

I confirm that the submitted work is my own practice. I have not included passwords, OTPs, identity documents or confidential student records.
