

Tally Prime with GST

Detailed Chapter Notes & Worked Examples - Volume 2

This pack develops practical understanding through explanations, worked examples, lab tasks and review questions. Complete the matching Foundation Pack first.

Chapter	Topic
1	Accounting foundation
2	Ledgers and vouchers
3	GST invoice
4	Reports and controls

Chapter 1: Accounting foundation

Concept notes

Assets and expenses normally carry debit balances; liabilities, capital and income normally carry credit balances. Every voucher must remain balanced.

Worked example

Cash purchase of stationery: Stationery Expense Dr, Cash Cr. Credit purchase: Purchase Dr, Supplier Cr.

Lab assignment

Classify 25 accounts and write journal entries for 10 transactions.

Review questions

1. What is dual aspect?
2. Difference expense and asset?
3. Why must voucher balance?

Evidence to submit: source file or working output, screenshot/PDF, and a 100-word explanation of decisions and checks.

Chapter 2: Ledgers and vouchers

Concept notes

Choose correct group because it controls report placement. Use payment for money paid, receipt for money received, contra for cash-bank transfer and journal for adjustments.

Worked example

Receive Rs 5,000 from customer: Bank/Cash Dr and Customer Cr through receipt voucher.

Lab assignment

Create company and enter a week of sample transactions.

Review questions

1. When use contra?
2. Why avoid unnecessary journal vouchers?
3. What does ledger group affect?

Evidence to submit: source file or working output, screenshot/PDF, and a 100-word explanation of decisions and checks.

Chapter 3: GST invoice

Concept notes

GST treatment depends on registration, place of supply, item classification and rate. Local supply uses CGST+SGST; interstate generally uses IGST.

Worked example

Taxable Rs 20,000 at 18% local: CGST 1,800, SGST 1,800, total 23,600.

Lab assignment

Create local and interstate invoices and reconcile tax ledgers.

Review questions

1. What determines place of supply?
2. When use IGST?
3. Why reconcile GST?

Evidence to submit: source file or working output, screenshot/PDF, and a 100-word explanation of decisions and checks.

Chapter 4: Reports and controls

Concept notes

Review day book, ledgers, trial balance, receivables, P&L; and balance sheet. Back up before major changes and document corrections.

Worked example

Customer balance should match invoice minus receipts and credit notes; investigate rather than force adjustment.

Lab assignment

Audit a sample company, list five errors and correct with notes.

Review questions

1. What does trial balance show?
2. Why review outstanding?
3. When take backup?

Evidence to submit: source file or working output, screenshot/PDF, and a 100-word explanation of decisions and checks.

Final Applied Assignment

Create one original project that combines all four chapters of Tally Prime with GST. Use realistic but non-sensitive sample data. Submit planning notes, source files, final output, test evidence and a one-page reflection.

Assessment rubric

Area	Marks
Concept accuracy	25
Working practical output	30
Validation and testing	20
File organisation and presentation	15
Original explanation	10

Student declaration

I confirm that the submitted work is my own practice. I have not included passwords, OTPs, identity documents or confidential student records.
